Summary

Full-Stack Engineer focused on building production-grade SaaS applications with Next.js and TypeScript. Experienced in developing RAG systems, vector search with pgvector, AI-powered applications, and modern deployment workflows. Passionate about creating scalable products and seeking remote software engineering opportunities.

Projects

Nexus May 25 2026 - June 8 2026

AI-powered chatbot platform with RAG, pgvector semantic search, Cohere embeddings, Groq LLMs, Stripe subscriptions, and Dockerized development workflows.

<https://chatwithnexus.vercel.app>

Writerly May 11 2026 - May 15 2026

Full-stack blog platform with authentication, comments, CRUD functionality, and PostgreSQL-backed content management.

<https://writerly-app.vercel.app>

Formigo May 15 2026 - May 23 2026

SaaS feedback platform with an embeddable widget, Stripe subscriptions, real-time notifications via Pusher, and multi-project management.
